

AMORTIGUADORES

Principales características de la Línea de Amortiguadores Motorcraft® Hidráulicos y de Gas:

HIDRÁULICOS

Su funcionamiento se basa en forzar la circulación de aceite a través de orificios, ranuras y resortes localizados en el pistón y cabeza de compresión del amortiguador, así es la resistencia al paso del aceite lo que genera las fuerzas de compresión y expansión, mediante las cuales el amortiguador controla el movimiento de la suspensión del vehículo, brindando de esta manera confort y seguridad de manejo.

AJUSTOMÁTICOS

Son ajustables para afinar la suspensión dependiendo de la forma de conducir, carga habitual del vehículo y el tipo de camino, por medio de la preselección de 3 posiciones: normal, duro y extra duro, brindando un excelente control, estabilidad y confort en c/u de estas posiciones.

STRUTS REPARABLES, SELLADOS Y CARTUCHOS MC. PHERSON

Su diseño proporciona una mayor capacidad de amortiguamiento, comodidad y estabilidad en caminos irregulares, su pistón de 1 3/16" y barra de acero cromada de 20 a 22 mm., elimina virtualmente el desgaste de la suspensión, suprimiendo el ruido en el interior del vehículo.

REFORZADOS

Su principal función es la de absorber los impactos que a través de las llantas recibe el sistema de suspensión del automóvil, permitiendo ampliar la duración de los neumáticos. Ofrece un ajuste automático a las condiciones del camino.

EXTRA-REFORZADOS

Su robusto cilindro de 1 3/8" está diseñado para trabajo pesado, las resistencias hidráulicas están calibradas para camiones ligeros y pesados, los anillos del montaje están reforzados con soldadura de arco para mayor durabilidad, su sistema de válvulas permite ajuste automáticos a las condiciones del camino, lo que brinda mayor control y seguridad de manejo.

DE SOBRECARGA

Son ideales para vehículos que transportan cargas excesivas, remolques, etc., debido a que poseen un resorte externo que le proporciona capacidad extra de sobrecarga; su sistema de válvulas de rebote y compresión está diseñado para reducir el vaivén y el ruido, lo que permite un mejor manejo y control del camino (depende de las condiciones del vehículo, referente a llantas, resortes, suspensión, etc.).

CON GAS

Son amortiguadores hidráulicos presurizados con gas nitrógeno, que al ejercer más presión sobre el pistón brindan propiedades adicionales como son: respuesta inmediata de las ruedas a caminos irregulares manteniendo siempre el contacto con el piso, mayor estabilidad, reducción del nivel de ruido en su funcionamiento, eliminación de burbujas de aire en el interior del amortiguador y un manejo más seguro en ciudad y carretera.

REFORZADOS

Están diseñados para ampliar la vida del sistema de suspensión y llantas del vehículo, cuentan con un pistón de 1 3/16" que proporciona control y estabilidad para conducir, disminuyen el ladeo del vehículo y evitan que se incline al arrancar, frenas o curvar.

EXTRA-REFORZADOS

Son ideales para pick-ups, camionetas y vehículos pesados; su cilindro de 1 3/8" y su cámara de reserva de fluido de gran capacidad, altamente presurizados con gas nitrógeno, proporcionan un efecto de muelle de refuerzo, aumentan la vida de la barra de pistón y brindan confiabilidad en las condiciones duras de manejo.

STRUTS REPARABLES, SELLADOS Y CARTUCHOS MC. PHERSON

Son la mejor opción para el óptimo comportamiento de su vehículo, proporcionando gran estabilidad y confort de manejo, gracias a su alta tecnología y diseño, ya que el gas nitrógeno da mayor velocidad de respuesta a la suspensión.

PRESENTACIONES

Reforzado (Hidráulico y Gas), Extra-reforzados (Hidráulico y Gas), Struts Reparables y Sellados (Hidráulicos y Gas), Repuesto Mc. Pherson (Hidráulicos y Gas), Ajustomáticos (Hidráulicos), Sobrecarga (Hidráulicos).

APLICACIONES

Para todas las marcas de vehículos Ford, Chrysler, General Motors, Nissan, Volkswagen, Dina, etc.

GARANTÍAS

Ford Motor Company garantiza los Amortiguadores contra defectos de material y mano de obra bajo condiciones de uso normal y servicio de acuerdo con la siguiente tabla:

Hidráulicos utilizados en vehículos particulares por 75,000 Km. ó 3 años, lo que ocurra primero, contados a partir de la fecha de venta de la parte.

De Gas utilizados en vehículos particulares por 101,00 Km. ó 4 años, lo que ocurra primero, contados a partir de la fecha de venta de la parte.

Hidráulicos utilizados en vehículos comerciales por 50,000 Km. ó 1 año, lo que ocurra primero, contados a partir de la fecha de venta de la parte.

De Gas utilizados en vehículos comerciales por 50,000 Km. ó 2 años, lo que ocurra primero, contados a partir de la fecha de venta de la parte.

Ford Motor Company, garantiza la mano de obra bajo condiciones de uso normal y del servicio de mantenimiento adecuados en los casos que el servicio haya sido efectuado en los talleres autorizados Ford.
